WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Temperatures will cool off substantially over the next couple of days as an upper level trough shifts over the Pacific Northwest. Winds will become much lighter at the coast heading toward Thursday as low clouds return tomorrow night.

San Francisco Weather:

A deep marine layer and onshore breezes will keep cool temperatures across the bay area today through Friday. Seasonable weather over the weekend as dry weather continues. Temperatures are forecast to warm once again early next week as high pressure builds and the marine layer compresses once again.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Things still on track for a cool down in the weather through Friday, with temperatures down into the 80's. Temperatures warm back up into 90's over the weekend. Weather system bringing cooler temperatures will bring wind and fire concerns Wednesday and Thursday to the far northern areas of forecast area.

Hanford Weather:

Increased onshore flow will provide for slightly cooler temperatures and breezy conditions today. Near normal temperatures are then expected for the remainder of the week and through the weekend.

WEATHER SYNOPSIS BY REGION: (Cont.)

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Night through morning low clouds will persist through period across the coasts and valleys. It will be clear across the interior. It will be breezy across the mountains and deserts into Friday. The nightly temperatures will be a little above normal into early next week, with the afternoon temperatures about normal.

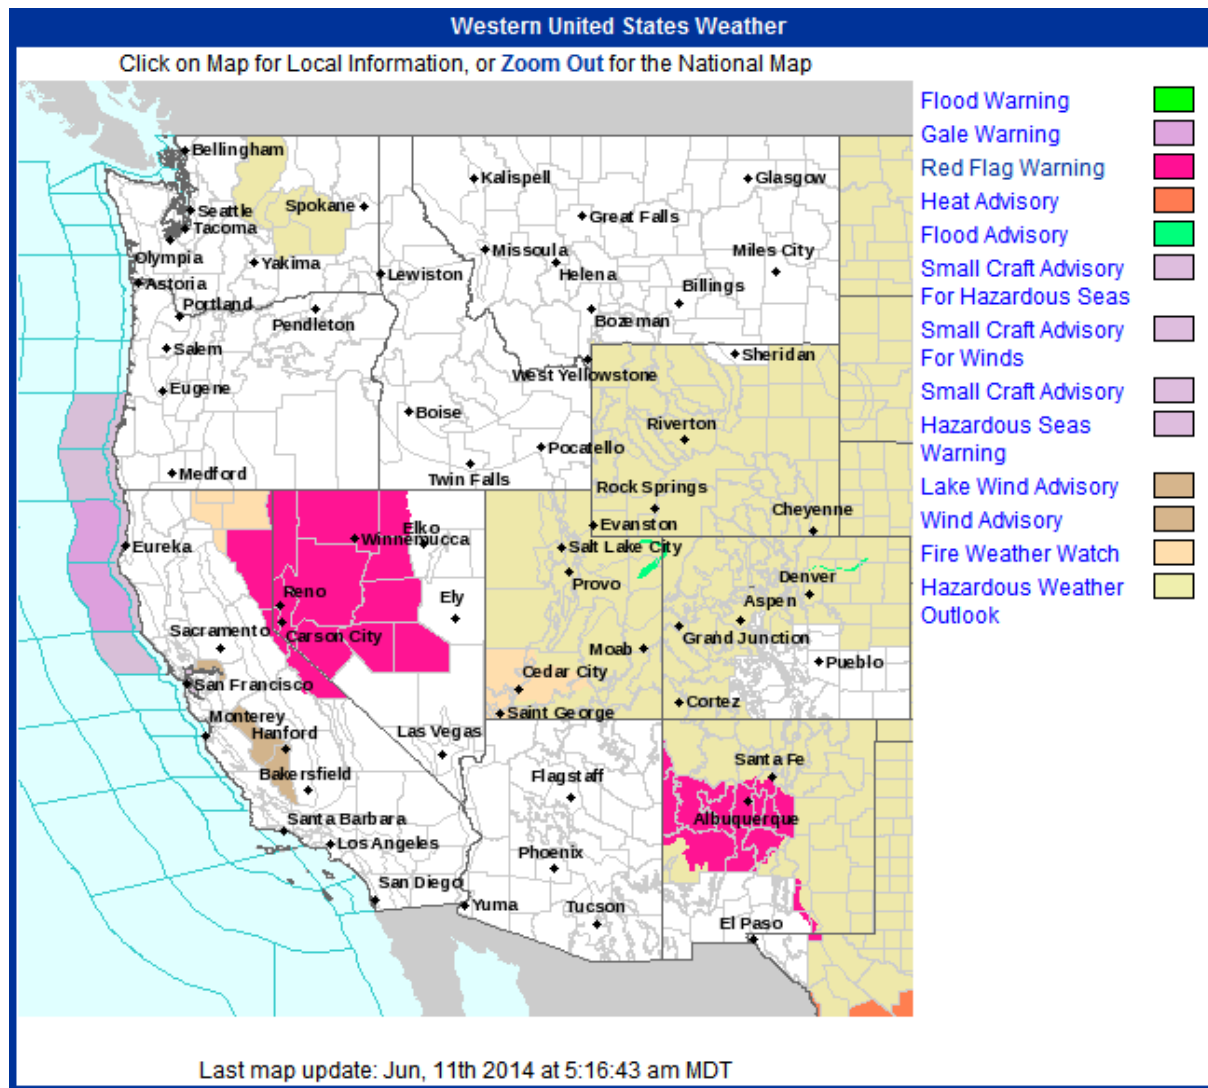

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A trough of low pressure will move across California late this week reinforcing the maritime effect across coastal southern California and the inland valleys. Little change is expected through early mid next week with areas low clouds and fog extending into the valleys each night and morning, followed by mostly sunny afternoons away from the beaches. Gusty westerly winds will continue through the mountain passes and along the desert slopes at times during the late afternoons and evenings.

Southeast California Weather:

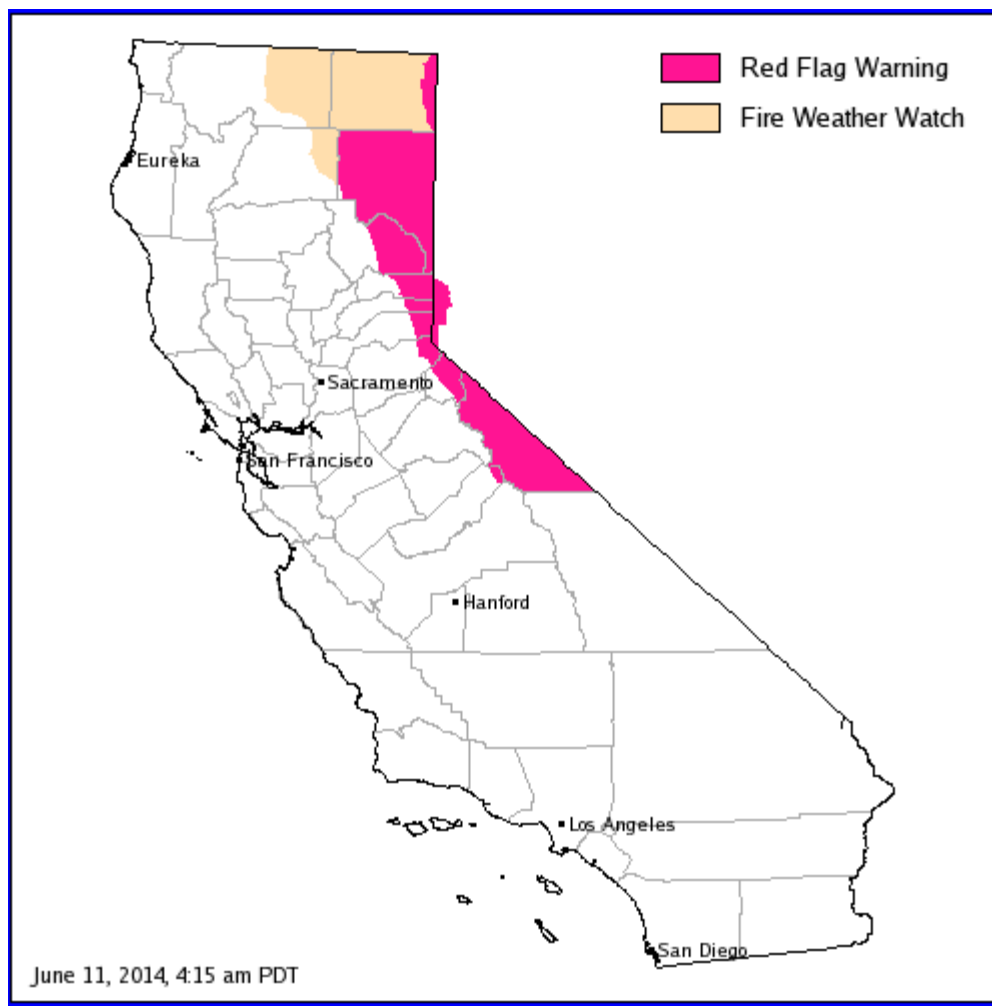

Strong high pressure centered over northern Mexico will maintain near to above normal temperatures and very dry conditions through the coming weekend into early next week with only slight fluctuations in temperatures expected.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is 0800-1700 hours.

Cal EOC Incident – 2014 Drought

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue without substantial rainfall, severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

****As our state's rainy season comes to an end, it is highly unlikely that precipitation totals will increase significantly. This winter's below average rain and snowfall worsens conditions in this third straight dry year.***

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

Situational Summary (Cont.)

- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- The final manual snowpack survey of the season was conducted on Thursday (May 1) and showed California snowpack at 18% of normal. A more recent update using automated devices shows snowpack at 0% of normal as of June 3.
- DWR has announced that water essential for health and safety will be delivered through the state water project. The current State Water Project Allocation is 5%.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
